### **SUMMARY**

Motivated MERN Stack Developer with hands-on experience in building responsive and user-friendly web applications using React.js and MongoDB. Proficient in API testing and development using Postman. Currently expanding expertise in Node.js and Express.js to strengthen full-stack capabilities. Strong problem-solving skills, quick learners, and a collaborative team player with a passion for creating efficient, scalable, and high-quality web solutions.

### **SKILLS**

#### **Frontend:**

HTML5, CSS3, JavaScript (ES6+), React.js, Vue.js, Next.js, Redux, Redux Toolkit (Thunk), React Router DOM, Context API, Tailwind CSS, Material UI (MUI), Bootstrap

#### **Backend:**

Node.js, Express.js, MongoDB, MongoDB Atlas, MongoDB Compass

#### **Tools & Technologies:**

Git, GitHub, Postman, Visual Studio Code, Firebase, Cloudinary, AWS (Basic)

### **PROJECTS**

**MERN E-Commerce ([click here](#)):** : I developed a fully responsive MERN stack e-commerce web application using MongoDB, MongoDB Atlas, Express.js, React.js, and Node.js. The application features secure login and registration with JWT-based authentication, along with product listing, filters, search, cart, and Wishlist functionality implemented using React.js. I integrated Cloudinary for efficient image upload and media management and designed RESTful APIs with Express.js and MongoDB to ensure a scalable backend architecture. Additionally, I integrated Razor pay and PayPal payment gateways for secure and seamless transactions. The frontend is deployed on Netlify, while the backend is hosted on Render, using MongoDB Atlas for database management.

### **EDUCATION**

Bachelor of Computer Applications (BCA)  
Binoba Bhave University, Hazaribagh
